TELESTEPS PRIME

SIMPLICITY

We have always believed that the best ladder is both short and long. The telescopic ladder is easy to extend to the desired point, and locking it before use is just as easy.

FLEXIBILITY

The ladder can be adjusted to the ideal height to suit your needs. It is small and compact for storage and transport and, with its telescopic function, it is perfect for small spaces.

SAFETY

Telesteps makes no compromises. Its products are certified to the main standards - EN 131, SP - and more.

DESIGN

Prime is the first telescopic ladder with a triangular tube design, making it torsionally rigid and stronger than ever.

TECHNOLOGY

Telesteps has developed a sophisticated braking system to minimise trapped fingers and ensure controlled closing of the ladder. It is not only safe, it also makes the ladder easier to use.

INCLINATION

The ladder is designed to be used at an angle of 75°. Its wide, angled and grooved rungs (parallel to the ground) make you feel safe while using it.

ACCESSORIES

We offer a range of smart accessories that make the ladder easier to use.

TELESTEPS
No.1 in telescopic work tools

PRIME **3.00m**

PRIME **3.50m**

PRIME **4.10m**

No. of steps	9	11	13
Overall height *(m)*	3.00	3.50	4.10
